

School days countdown!

Preparedness tip #2

Don't fret if your soon-to-be-kindergartner doesn't know her ABCs and can't use scissors with skill. Or if the one heading into first grade seems behind his peers in math. **Start reading to your child at least 15 minutes a day.** It's the best possible preparation for a new academic year –

and an essential habit for your little one's long-term success at school!
